

GLS TPEs will make your products feel better...

**...look better,
grip better,
and sell better!**

From a soft-touch to a non-slip grip. From colorability to new design options. GLS TPEs give your product the marketable advantage necessary to get noticed in today's highly competitive environment.

Count on GLS to transform your concept into a breakthrough product or enhance your existing product with the most advanced TPE technology out there. With over 20 years experience, we're pioneering developments in providing the clearest and softest thermoplastic elastomers possible; as well as TPEs that can be over molded onto polycarbonate, PC/ABS, ABS, polypropylene, polyamides and more; with lasting results.

And like our TPEs, GLS solutions are unique to your needs. Our engineers work with you to design a custom TPE with the specific physical properties and aesthetics essential to **your** application.

For an appointment, or a CD-ROM describing GLS products and services, call us at **1-888-667-3240**, or email us at info@glscorp.com.

Realize the Potential. Feel the difference.®
